WORK EXPERIENCE

GlobalLogic (Client: Google Fiber) *Senior Software Engineer* **May. 2024 – Aug. 2026**

- Developed core frontend functionality for GFiber's **payment platform serving millions of customers**
- Implemented key components of GFiber's transition from **internal Google tooling/Angular** to **React, Next.js, Google Cloud Platform**
- Collaborated with product managers, designers, and backend engineers to translate product and business requirements into production-ready billing user experiences using **Adyen, React, Zuora**

Google *Software Engineer* **Oct. 2020 – May 2023**

- Eliminated large amounts of technical debt by porting dozens of legacy **Angular.js** components to modern **Angular/Typescript** with **functional programming, RxJS**
- **Drove architectural decisions and designed technical solutions** for complex new features of a unified telemetry analysis and reporting **distributed system** that collects metrics from **hundreds of millions of users**
- **Mentored new team members,** teaching them about our codebase and development best practices
- Diagnosed and **remedied compliance issues** with **cloud-based deployments** of applications and services
- **Collaborated with designers** and gathered feedback from key stakeholders to formulate solutions to changing customer needs

Self-employed/Freelance *Full Stack Software Developer* **Aug. 2019 – Oct. 2020**

- Implemented many different **3d product customizers/visualizers and games** using **WebGL, React, Three.js, Node.js, Angular, Unity, C#, and Typescript**
- Quickly learned the quirks of numerous new codebases to fix issues for many different clients, with 100% satisfaction rate
- Diagnosed and **remedied UI performance issues**

PowWow *Full Stack Software Developer* **Mar. 2018 – Aug. 2019**

- Created functional, pixel-perfect implementations of UI mockups using **Angular**
- Maintained customer-facing **SAAS products** such as visual block-based script editors and codeless UI editor with a **Node.js, MongoDB backend**
- Diagnosed issues with and configured services to run on **AWS**

SKILLS

- **Languages:** C, C#, C++, CSS, HLSL, HTML, JavaScript, Java, SQL, Typescript
- **Technologies/Frameworks:** Angular, NoSQL, Node.js, React, RxJS, Three.js, Unity, WebGL
- **TechnicalSkills:** A/B Testing, API Development, CI/CD, Databases, Functional Programming, Game Development, TDD, Web Development, UI Development, RESTful APIs, 3D animations/modeling
- **Development Tools:** AWS, Git, Linux
